And in 2016, creation of two new websites : iseor-formations and iseor-consulting

[INTERNATIONAL CONSTRUCTION OF AN INNOVATIVE THEORY]

2 founding principles: socio-economic management and intervention-research

- In addition to its interventions in France, ISEOR also gets involved internationally:

- 46 countries in 4 continents

- ISEOR publications are issued in three languages:

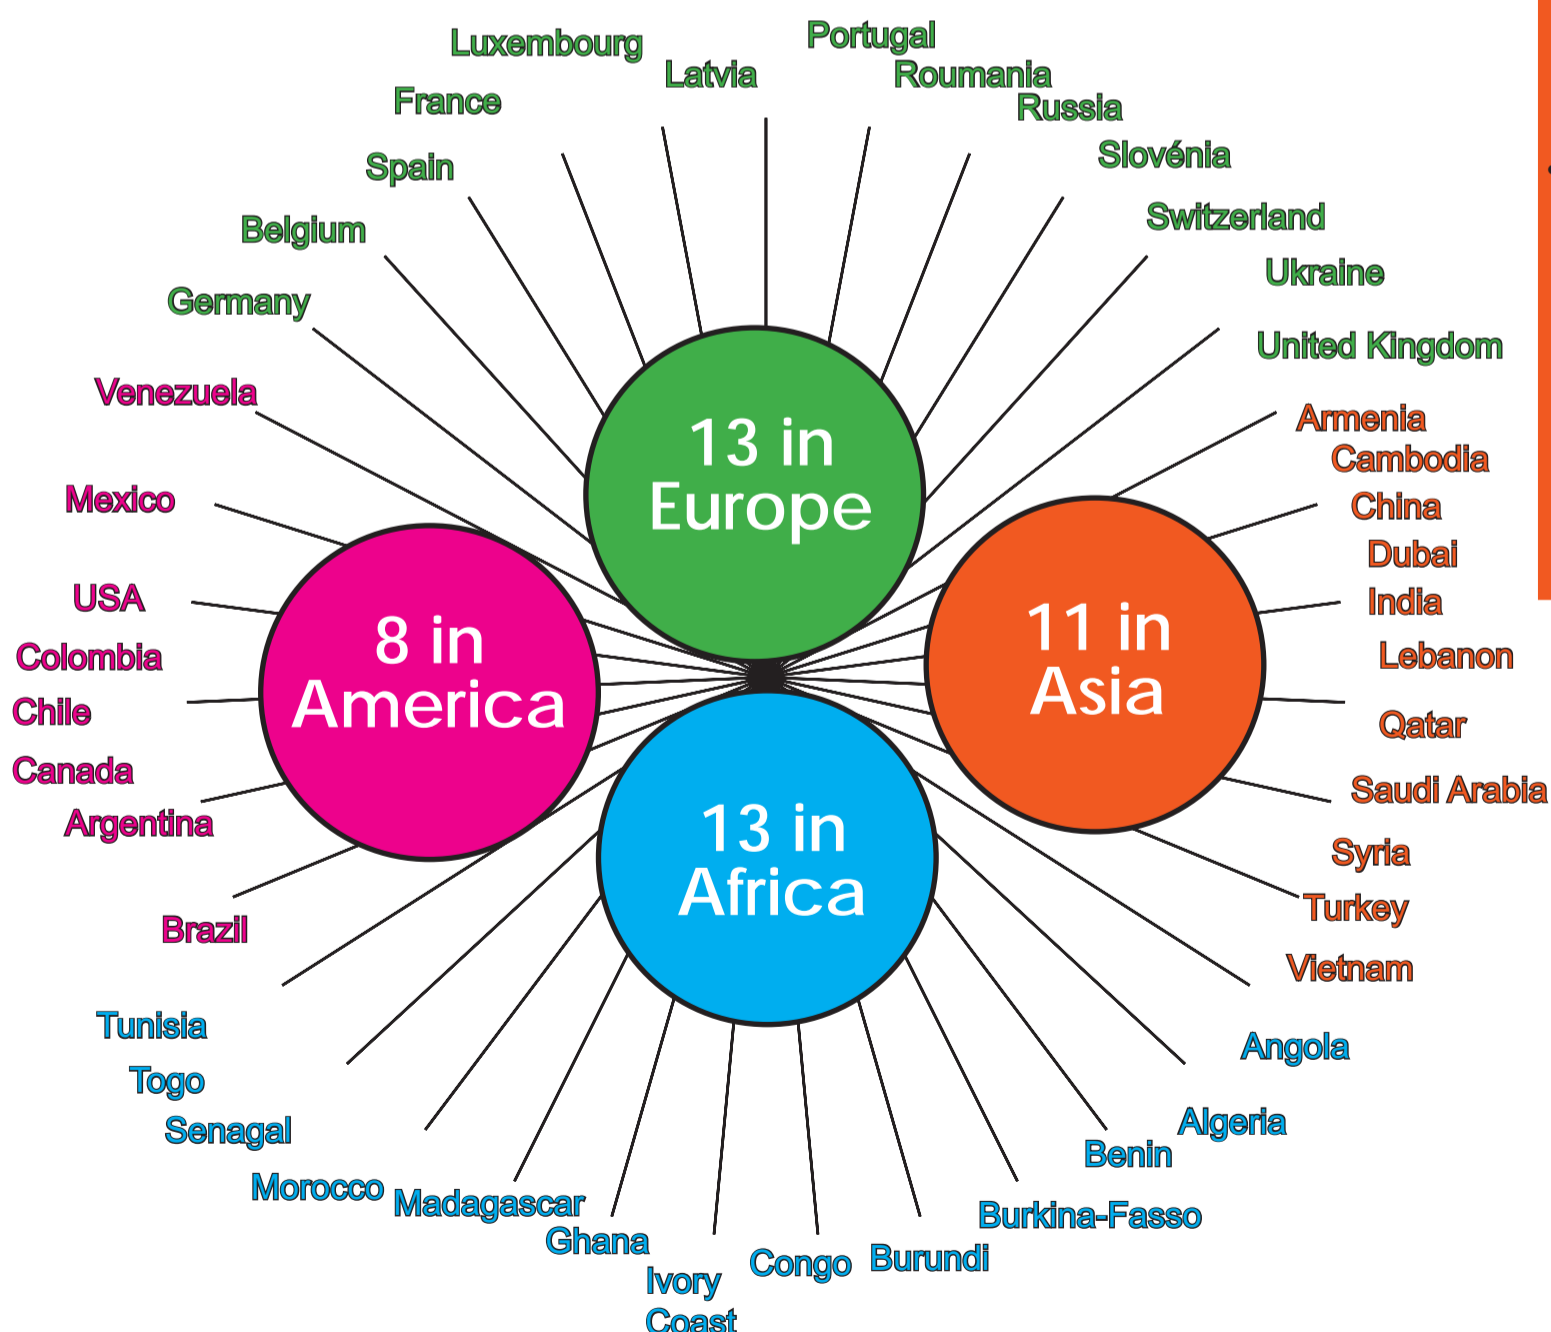

- French
- English
- Spanish

- Symposia organized by ISEOR featuring simultaneous interpretation between French, English, and Spanish

- 3 pilot countries:

- intensity of research-interventions

- in France
- in Belgium
- in Mexico

• 2017 - NOMINATED CHEVALIER (KNIGHT) OF LEGION OF HONOUR

- Henri Savall has been nominated (knight) of Legion of Honour, by way of french Ministry of Higher Education and Research.
- This high national distinction rewards Henri Savall for his many international works for an economy more human, a social life more ethical and a University more civic and less elitist.

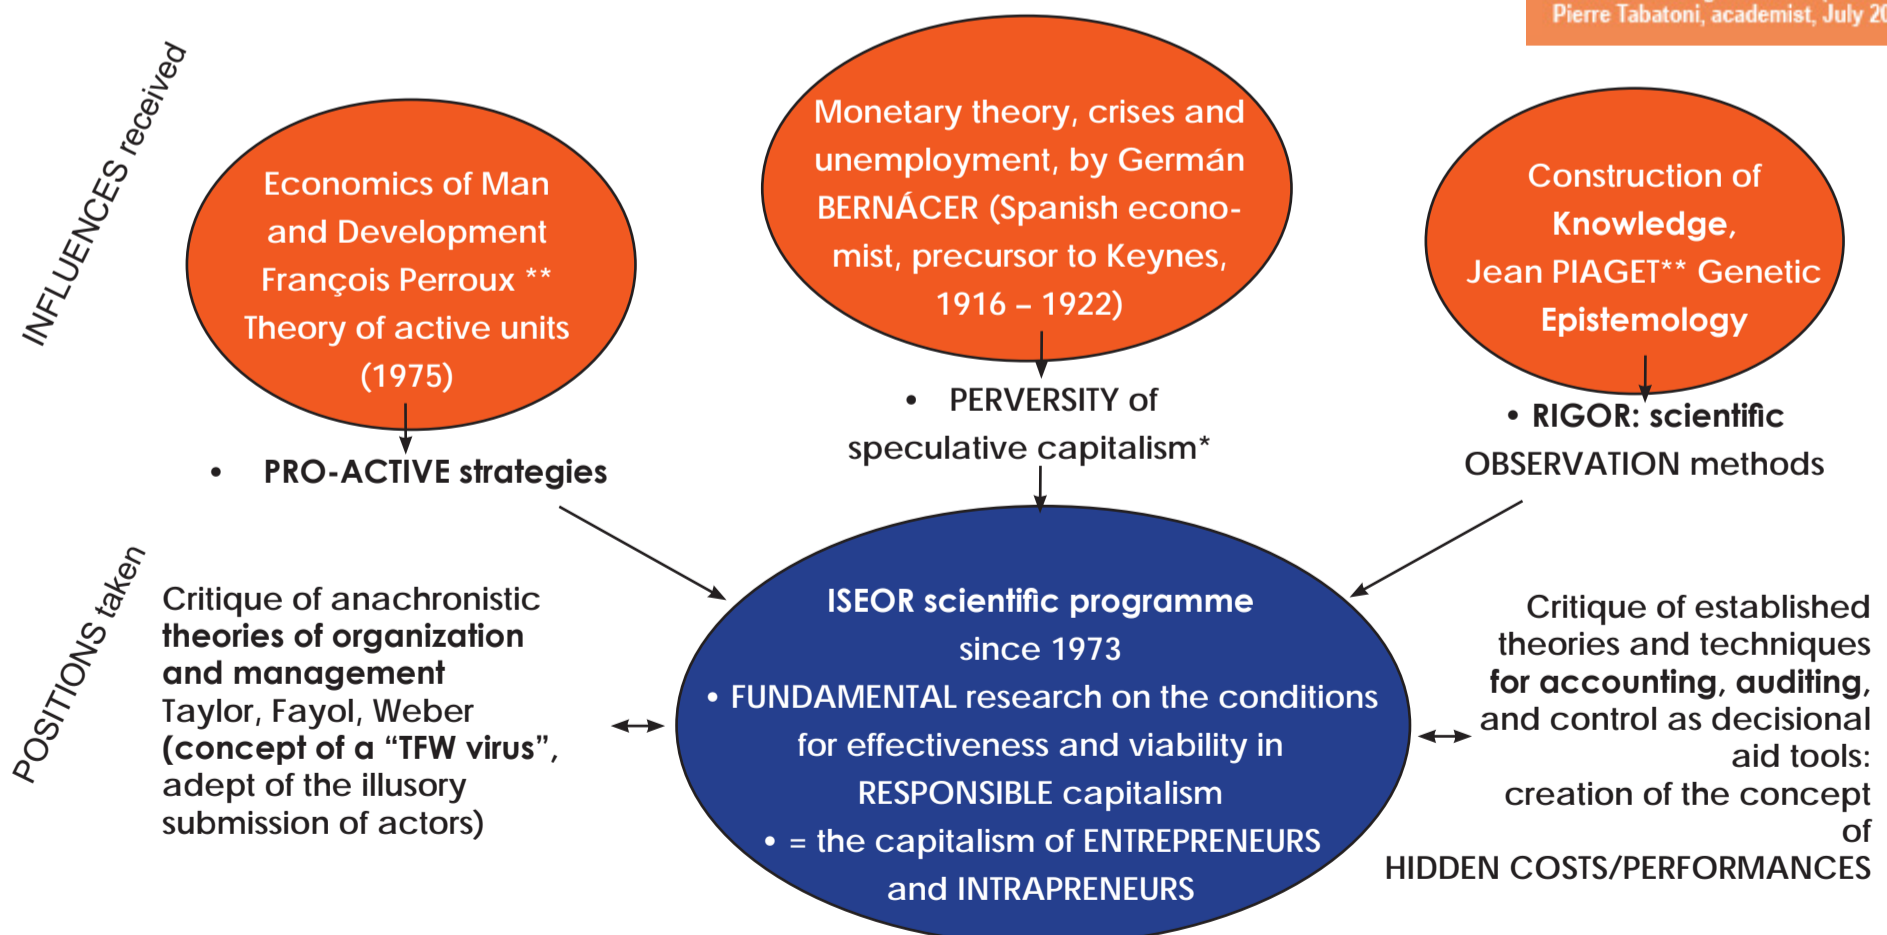

[GENESIS OF THE SOCIO-ECONOMIC THEORY OF ORGANIZATIONS]

An alternative to the established but fragile macro-economic theory

- **Purpose:**
 - SUSTAINABLE (as opposed to ephemeral/speculative) economic and social performance involving a GLOBAL approach to the organization
- **Refutation of theories:**
 - Classical, Marxist, neo-classical, Keynesian theories on the two (equivalent?) production factors of capital and work.
 - Works on econometrics (Carré, Dubois, Malinvaud, 1972):
 - The Capital/Work model accounts for only 45% of French growth
 - **Mysterious residue of 55%: enlightenment by the theory of HIDDEN COSTS/PERFORMANCES**
- **Proposed paradigm:**
 - Human potential is the sole ACTIVE factor in creating added value
 - **Technical and financial capital: "inert" inner TOOL**
 - Dominance of the COMPLEMENTARY NATURE of the two factors as opposed to substitutability
- **Principles (experimented)**
 - Generalization of the ORGANIZATION concept
 - Nation = complex macro-organization
 - Unification of the economic purpose of public and private organizations, be they profit-making or not: generation of ADDED VALUE
 - Redefinition of an organization's goal: concept of A BALANCED DEVELOPMENT BUDGET, substituting that of maximized profit.
 - System of socio-economic reporting for INTERESTED PARTIES: economic performance indicators (immediate results + creation of potential).

- In 2009, Henri Savall was made Chevalier dans l'Ordre des Palmes académiques by the Ministry of Education for the services rendered to the Department of Education

[SOCIO-ECONOMIC THEORY AND MANAGEMENT (“THÉOSE”)]

Development of concepts and timeline

• Theory of the strategic platform

Premise

Organization of a dialectic system for conflicts-cooperation

- The way resources are Apportioned (time, skills, non-material and material investment) determines the DEGREE OF COHESION of an organization or the robustness of the PLATFORM

- The **Multiplying** effect of the platform's robustness: doubling the degree of cohesion can at least triple the level of performances

• 3 warning ratios in the strategic running of organizations

- 1/ Hidden costs (performances) / visible costs (performances)
- Indicator of the origin of lost effectiveness and efficiency
- An upward trend in this ratio is forewarning of a loss of effectiveness and efficiency

- 2/ External costs (performances) / internal costs (performances)
- The BOOMERANG effect of EXTERNALIZED costs leads to aggravation of the COSTS assumed by the organization
- Outsourced PERFORMANCE can represent a performance-producing INVESTMENT that benefits the organization

- 3/ Indirectly productive time / Directly productive time or value of POTENTIAL-CREATING activities / value of activities yielding IMMEDIATE RESULTS
- NON-MATERIAL investment indicator for the current period, enabling an increase in the effectiveness and efficiency of ensuing periods
- The current pressure of constraints tends to lower the numerator and thereby degrade future results: RISK for the survival and development of the organization

• Result of non-material investment on profitability

The work of ISEOR in over 2.000 companies or public or private organizations (72 different sectors, great variety of sizes: 4 to 30.000 persons) have demonstrated the very high profitability of investment in human potential

- Between 200% and 4,000%
- €1 invested in developing human potential gives a ROI of €2 to €40
- No technological investment can offer that kind of profitability

Tools for capitalizing scientific knowledge

The expert socio-economic management system for companies, consultants, teachers

- **SEGESE is a software package created and developed by ISEOR to help improve intervening staff's productivity and work quality, while accelerating the transmission of know-how and of the ISEOR knowledge base.**
- This software package is a **genuine decisional aid tool for consultants and intervening staff** and is based on advanced artificial intelligence techniques.

It was **devised in 1985** by Henri Savall, Veronique Zardet, and Nouria Harbi then developed with the ISEOR team.

- **These applications** aim at consultants and companies trained in the socio-economic management approach.
- **CEPA software*** enables researchers to check their own texts before submittal for publication in reviews and helps reporters' more easily assess articles submitted to Revue Sciences de Gestion - Management Sciences - Ciencias de Gestión.

[FRANCHISEES AND TECHNOLOGY TRANSFER]

Thoroughness and quality control in technology transfer

ISEOR has implemented and developed a network of franchised consultants authorized to use the socio-economic intervention method under the ISEOR banner.

This network exists to help with the ISEOR policy of disseminating new strategic management practices by providing a greater sample size of companies and organizations who enjoy the benefits of the ISEOR method.

By practicing innovative interventions within companies and organizations, the franchised consultant participates in the

- transfer of experience in socio-economic management engineering and its ongoing refinement to companies
- methodical support to companies undergoing change

- ongoing input to the research centre's scientific and technical capital (enrichment of its knowledge and data bases).

Thanks to his endorsement by an internationally reputed research centre, the franchised consultant enjoys

- thorough quality control
- ongoing training and improvement
- competitive advantages in the consultancy market

Professionalism of consultants and managers

The issue:
degradation of management methods and tools over time (organizational entropy)

- **Objectives:**
- Encourage and support rigorous management practices
- Provide accompaniment in the ISO 9000 certification process
 - Make good socio-economic management practices a lasting concern

- Maintain know-how in companies (maintenance)
- Ensure quality in the actors' working conditions

Three stances:

- 1- Socio-economic management leading up to the preparation for ISO
- 2- Socio-economic management in reactivating ISO
- 3- Simultaneous socio-economic management and preparation for ISO

[REGULATED PROFESSIONS - PUBLIC NOTARY, ARCHITECTS, LAWYERS...]

Longitudinal research-intervention, since 1997 (15 years)

• Objectives:

- **Improve the quality of operations and management** in their offices and in their service to clients
- **Make the profession more attractive to young people and employees**, to favor the installation of young professionals
 - **Take up new challenges:** increasingly competitive environment, sterner demands from customers, fragility of the offices' financial performance (property bubble)
- **Accompany studies** into the implementation of ISO 9000 standards (since 2004)

• Methodology:

- **500 notarial offices** employing 1 to 70 staff
 - **11 regions:** urban, rural, semi-urban
- **Measurement of hidden costs** in each office: €15.000/person/year
- **Implementation of internal and external quality plans**, both medium and long term
 - **Mobilization of employees**, cohesion of teams
 - **Improvement in the quality** of service
 - **Application of the HORIVERT model** on a macro-economic scale to the running of a project with national scope involving 3 levels: departmental, regional, and national.

• By request from the Higher Council of Notaries

- « Operation YOUNG PEOPLE »
 - **Methodological assistance** in this prospecting operation
 - **Survey by questionnaire**, with 5.000 young people, students and professionals
- **Qualimetric study** on the basis of 500 research-interventions in offices covering 11 regions
 - **Organization of conferences-debates** with young professionals, notaries, and employees for building action plans
- **Innovative creation of an Advanced Diploma in Notarial Studies ("BTS") by the CSN**
- **In public-private partnership:** National education/Notary Schools managed by the profession
- **HORIVERT intervention-research** on the running of the project and the assessment of local and national cooperation between Sixth Form Colleges/Schools, and professional institutions.

• Results for the laboratory:

Enrichment of the Institute's knowledge base through

- **experimentation with the change process** in a very high number of very small companies on a national scale
- **identification of the capacity for change** in a regulated profession
- **contribution to the epistemology and methodology** of qualimetric research

• From 2008: partnership with the Rhône-Alpes Association of architects

- **Implementation of a device of intervention-training with 10 offices of architects.** The convincing results of this device led to propose, in partnership with the Rhône-Alpes Association of Architects, a Master's degree « Management of Regulated Liberal professions » at the University Jean Moulin Lyon 3.

In 2016 : Creation of a **new partnership with ACTALIANS**, a funding organization of trainings for regulated liberal professions, in order to accompany them in the development of their business.

Modernization of public services Contribution to the assessment of public policies

• **Modernization of organizations and growth of their performances**

- Since 1979, ISEOR has intervened in many administrative **bodies and organizations participating in the public service:**
 - In the **sanitary and social sector**,
 - St Etienne University Hospital – 1979
 - Socio-educational establishment – 1984
 - Medical-social establishment – 1988
 - Clinique St Pierre – Belgium 1993
 - Lyon Civil Hospices– 1996
 - In local and **regional government councils**
 - Amiens town council – 1985
 - St-Andre-le-Côte town council – 1987
 - Loire department council – 1995
 - Rhone-Alpes regional council – 2002
- An exemplary action at **the Lyon office of the URSSAF (social security contributions collection body) (1998):** advanced action toward management modernization, implementation within the Lyon pilot body of tools for dissemination to Social Security national strategy officers.
 - Pilot actions in **two Chambers of Commerce and Industry**
 - Bordeaux chamber: airport, Higher School of Commerce, etc.
 - **Morbihan Chamber:** port, assistance services for SMBs, etc.
 - **Pilot actions on a national scale:**
 - with the National Centre for the Public Territorial Function (CNFPT) – France
- with the Professional Public Training Office in Morocco [OFPPT]
 - with the “Oficialía Mayor” Ministry of the Government of the State of Yucatán (Mexico)

• **Contribution to issues of general interest**

- For the development of **training in working conditions in universities and higher educational institutions:** as part of the Stoleru Commission (FNEGE, 1975; Henri Savall: General Reporter)
 - **Several major French institutions that have supported ISEOR and its development through intervention-research contracts:**
 - National Foundation for Management Training (FNEGE), 1975-1984
 - National Agency for the Improvement of Working Conditions (ANACT), 1976-1981
 - DGRST, 1976-1981

 - Construction Plan, 1984
 - Ministry of Research – Prospecting and Evaluation Centre, 1987
 - Group for the Fight against Illiteracy (GPLI), 1992
 - National Agency for Health Accreditation and Assessment (ANAES), 2003
 - **National level cooperation with two regulated professions:**
 - **Certified Public Accountants and Public Notaries:** actions covering the whole profession, at the request of the Higher Council of the Order of Certified Public Accountants, Higher Council of Public Notaries and their regional and departmental offices
 - Training actions for SMB consultants and assessment of the effectiveness of consultancy actions subsidised by FRAC then creation of the “development of the consultants professionalism programme
 - Prospective studies of sectors in change: yearly University-Company symposium organized by ISEOR and proceedings published by Economica, publisher, Paris

Invitation to the OECD annual meeting in 2011: **specificity of the Socioeconomic Management method as a model of modernization of public services.** Presentation to the representatives of 28 participating countries of the feasible and viable strategies of innovation in public utilities.

• **FOREM (Wallon public service governing Employment and Training):** a highly advanced, exemplary action in favour of management modernisation within a flagship public organisation.

- **Longitudinal intervention-research since 2001** (8 years) in a large public administrative body.
 - Training all executives, top management, and intermediate supervisors, in socio-economic management, followed by the whole of the personnel, **namely 4400 persons**
 - **Intervention across all Forem sites throughout Wallonia** (Belgium)
 - In-depth training by ISEOR at Lyon-Ecully of **170 executives, managers, and internal intervening staff via the training programmes**
 - **Network of 35 in-house interveners** (ISEOR certified)
- Forem has negotiated with the Walloon government so that “Socio-economic management” and the “Socio-economic management control” method (and its application in analytical accounting) are featured in the current 4-year Management Contract signed between the Forem Administration and the Government of Wallonia.
- Regular talks by Forem at the ISEOR yearly Symposium; organization by the ISEOR-Forem partnership of the 2007 Symposium on “Modernization of the Public Service – the fertility of public-private partnerships”

[YEARLY UNIVERSITY - COMPANY SYMPOSIUM]

Public validation and dissemination of intervention-research results

Mixed symposium of researchers and management practitioners: METHOD for VALIDATING scientific assumptions on conditions for the viability of effective, efficient pro-active management

• Actors in companies, public organizations, and non-profit organizations testify on the intervention-research process and observed results

• Public debate among researchers and practitioners on the refinement of methods for conducting change and accompanying strategic change in organizations

• Dissemination of the results of innovative research through papers co-authored by researchers and practitioners and published by a publisher

ISEOR has been publishing a collection of works since 1982

Éditions Economica

Éditions EMS

After each symposium, organised by ISEOR, either alone or in partnership with other institutions, a book is published to promote

- stimulation in companies and organizations of more pro-active, more effective, more efficient management
- increased financial and social performance, with greater sustainability
- collaboration between researchers and practitioners to produce more robust scientific management knowledge

Partnership for a socio-economic policy for proper employment

- The ILO is interested in ISEOR's work because it deals with universal issues affecting social standards, especially
 - training
 - illiteracy
 - qualifications
 - discrimination
 - health and safety at work
 - working conditions
 - real wages
 - employment
 - personal expression
 - remunerations

• The ILO considers the concept of socio-economic management to be a contribution toward resolving these issues.

"Full development of the human resource potential that a person represents through his/her contact and collaboration with his/her working colleagues is at the very least initiated. The spirit of participation feeds on personal interest, widely and concretely understood: service to the company converges with service to all the people it unites.

That's the hope put forward by Henri Savall when recommending use of the "periodically negotiable activity contract", which when faithfully followed and in the best cases (1), will raise work in dignity from instructed to freely consented".

(1) Routine optimism based on poor information has no place in Henri Savall's mindset.

Honorary professor at Collège de France, Chairman
of the Institute of Mathematical Sciences and
Applied Economics.
(Preface to the book "Rebuilding the Company", 1979)

"This is why I express the wish that bosses and trade unionists alike grasp the tool proposed by Henri Savall and experiment with it. This would without doubt be the best possible test."
Jacques Delors (Preface to the book "Enriching human work", 1975).

Development of sustainable financial and social performance

ISEOR practises widespread intervention in Belgian and Walloon companies and organizations.

Application of the ISEOR socio-economic method has been the subject of intense investment in Belgium since the 1990s.

- **Partners: pilot Belgian companies:** FOREM and TECHNORD
- **Yearly ISEOR symposium:** «Modernization of public services - public/private partnership», organized in partnership with FOREM in November 2007, the latter having published an article in his magazine on the socio-economic management implemented in the Paul Bocuse Institute.

Le magazine du Forem | Trimestriel | Avril/mai/juin 2008 | Numéro 18

In the Paul Bocuse Institute, cooking and management are good housemates.

Testimony from the Paul Bocuse Institute's general manager Hervé Fleury, who has been applying ISEOR socio-economic management methods since 2006.

Extracts from the article written in "Regards", the Forem (Belgium) magazine, June 2008.

"The socio-economic model seems compatible with our objectives. We started from the principle that to obtain quality training, we must count on effective teachers who are totally dedicated and available passing on their know-how and teaching. Furthermore, to plan what we do with our employees for the next 10 years, we must unite all the actors around a common project. The way the ISEOR model takes account of management in both its social and financial aspects pleased me ... in so far as it proposes a return on investment based on the search for hidden costs caused by organizational dysfunctions. The ISEOR method begins with an audit and a financial assessment of dysfunctions. This requires gaining employees' confidence so they feel able to explain which practices cause problems, and it requires determination from the manager, who must be able to keep on listening. The exercise provided the basis for an excellent reappraisal of the whole organization.

Besides this initial audit, the socio-economic model comprises a battery of tools, since progress must be accompanied by measurement of performance. The tools developed by ISEOR might at first sight seem subtle and complex. There are three basic concepts in socio-economic management: quality, quantity, and economy. Each must be routinely taken into account.

Some of the changes we have implemented are the monitoring of the organization and the coordination of training, which showed a quality deficiency due to excessive tasks being entrusted to a single team. We therefore decided to share the tasks out differently. This provided a gain in effectiveness and in the quality of accompaniment.

Change has not been easily accepted by employees. Some of the team experienced it as a kind of dispossession. In January, 2008, we implemented the "Periodically Negotiated Activity Contract" affecting all employees. Each of them put forward an action plan which was then officially validated. Depending on the financial results of this (based on measurable criteria), the employee can enjoy a bonus of up to 5% of his yearly pay. I started by upholding the principle that this bonus must not represent an extra cost for the company, rather a gain linked to the elimination of dysfunctions. The elimination of such dysfunctions produces added effectiveness, added economy, added motivation, and in the end, added overall quality, with impact in both the financial and social realms. To conclude, these tools became common to all staff. Every time we implement an action, we calculate the financial balance (financial consequences versus measurable consequences of the action on quality and quantity). Certain tools are even transferred (as far as methods go) to our students. Thus second year students, one of whose tasks is to create a project, have drawn up a competency grid showing which shortcomings must be taken care of. It's a lot easier to conduct a project when strengths and weaknesses are known."

Publications

- Several works entirely dedicated to socio-economic management have appeared in both the USA and France
- In the USA, works relating to the socio-economic theory were first taken account of in 1981, with the first publication of Henri Savall's doctoral dissertation "Work and People: a financial Assessment of Job Enrichment", preface by H.I. Ansoff (founder of the "strategic management" concept). Published by Oxford University Press of New York, this is a translation of his 1974 complementary thesis sponsored by the University of Paris-Dauphine and published in French by Editions Dunod and titled "Enriching human work in companies and organizations".

- The second step was broached when Prof. David Boje (NMS University, USA), manager of the prestigious "Journal of Organizational Change Management" review, Emerald, 2003, dedicated a special edition (very rare for a theory coming from outside the Anglo-Saxon world) to the socio-economic model created by Henri Savall and developed by ISEOR.

- The socio-economic model is the only management theory endorsed by the ILO (Geneva, 2000, 2008). It has been published simultaneously in English, Spanish, and French for the attention of the directors and management of small and medium sized companies.

■ The idea for this book was born out of a meeting with Professor Anthony Buono (Bentley College, Boston, USA) initiated by ISEOR. Given the non-existence of any work similar to ISEOR's in the USA, Prof. Anthony Buono proposed writing and coordinating the publication of this book. It is therefore the result of an audacious strategy named "Operation Lafayette", which inspired collaboration between ISEOR and American academics through a scientific dialogue based on original ISEOR research and not on the application of Anglo-Saxon models. This original book comprises 18 previously unpublished chapters dedicated to topics and cases in different private and public business sectors: four were written by American professors, one by a Mexican professor, and thirteen by ISEOR teacher-researchers.

■ This book is the English translation of a work by Henri Savall and Veronique Zardet titled (translation) "Controlling hidden costs/performance" and published in 1987 by Financialia (Harvard Prize for Expansion of Strategic Management). The preface is written by Prof. Anthony Buono of the University of Bentley College, Boston, USA. This book is the first of a series on Management Research and consultancy. In the light of the numerous problems a companies face, the idea is to be able to provide solutions in the field of change management by the application of socio-economic management. Through this work, teacher-researchers, independent consultants, and company directors can find explanations and answers to the problems of governance and conducting change.

• François Perroux, a visionary and a scholar

Born in Lyon in 1903, Perroux became successively Professor of Economics at the Universities of Lyon (1928 – 1937) then Paris (1935 1955). In 1955, he took the Chair in Economics at Collège de France, the most prestigious French university institution. Eighteen foreign universities bestowed honorary doctorates on him in tribute to his work. He founded the Institute of Applied Economic Science, “ISEA”, in Paris in 1944, which later became ISMEA. Perroux was a learned visionary and a militant. In “the Economy of the 20th century” he wrote, “If we fail to take account of a single man, humanity has lost a winning opportunity” and put forward “a new development philosophy” aimed at combatting under-development in the Third World. He was a fierce critic of the economic and financial policies conducted toward the Third World, slating them as being too quantitative, too Western, and too focused on the industrialized nations’ own interests. His thoughts remain incredibly current, placing people at the core of economic activity development.

Conferences for companies

In Rhône-Alpes Business Club

In 2016 and 2017, two conferences were organized with leaders, executives and managers of SME.

In the French Foundation for Management Education (FNEGE)

As early as 2016, FNEGE and ISEOR set up a seminary of training in the intervention-research for professors and researches.

Within a network of Swiss' Entrepreneurs

In December 2016, Henri Savall and Véronique Zardet held a conference within the Association Rezo-nance (a professional social network) on the theme «management at the service of the human being».

With the French Commercial Leaders

February 2017 – Conference on the issues of sales force in companies. The theme was “commercial innovations: all sellers in the organizations.”
